

NEW HORIZON COLLEGE OF ENGINEERING

EVENT NAME: Introduction To Library Information System, Students Clubs and Alumni Association

DATE: 6th Dec 2024

VENUE: Falconry Seminar Hall

BRIEF DESCRIPTION OF THE EVENT:

On December 6, 2024, New Horizon College of Engineering hosted an introduction to its Library Information System, Student Clubs, and Alumni Association. Dr. Anitha Rai, Director of Library and Alumni Relations, was the expert speaker. She enlightened 1st-year MBA students about the Library Information System (LIS), a digital platform for managing library resources. Through LIS, students can access books, study materials, past exam papers, and e-resources like journals from anywhere, enhancing their learning experience. The system promotes efficiency and real-time tracking of library materials.

Information about co-curricular and extracurricular clubs was also shared, including the process and criteria for joining. Dr. Rai highlighted the benefits of student clubs, which provide platforms for exploring interests, building social connections, and developing soft skills such as teamwork and communication. Student clubs can be academic, cultural, artistic, or sports-related and organize events, workshops, and competitions that contribute to holistic development. Effective club management involves leadership structures, membership tracking, event planning, and financial oversight. The session also emphasized networking and the importance of alumni. Overall, the talk was very effective.

GUEST DETAILS Dr. Anitha Rai, , Director -Library and Alumni relations , NHCE
